PROFESSIONAL SUMMARY

Frontend and full-stack developer who builds modern, responsive web applications with React, Next.js and TypeScript, and integrates LLM/AI and REST APIs. Creator of Maarif, a command-line AI chatbot built on Groq and Llama, with 50+ public project repositories. Six months of internship experience delivering real, in-use websites and a team-built student management application. Currently completing a BSc in Mathematics, applying strong analytical and problem-solving skills to engineering work.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, shadcn/ui, responsive design

Backend & Data: Node.js, REST API design & integration

AI / LLM: LLM API integration (Groq, Llama), AI chatbot development, prompt engineering

Tools & Foundations: Git & GitHub, version control, problem solving, applied mathematics

EXPERIENCE

Software Development Intern — AI-Noor Academy

6 months

- **Designed and built the academy's website** end to end, turning requirements into a responsive, multi-page site that is easy to navigate.
- **Collaborated with a small team to develop a student management web application** for adding, searching, viewing and updating student records.
- Contributed to several internal web projects, building and styling reusable UI components with HTML, CSS and JavaScript **[add React/Node here if you used them]**.
- Used **Git and GitHub** for version control and coordinated tasks across the team throughout the build.

PROJECTS

- **Maarif — AI CLI Chatbot.** Command-line chatbot built with Node.js and TypeScript, integrating Llama models via the Groq API for fast, streaming responses. (github.com/Shabnam-Fatma/cbot)
- **Dictionary App.** Web app in HTML, CSS and JavaScript that fetches and displays word definitions from a dictionary REST API — demonstrates async API integration.
- **Memory Card Game.** Interactive React game with card-matching logic, move tracking and win detection, built with reusable components and state management.
- **CRUD E-commerce Site.** Shopping site in HTML, CSS and JavaScript implementing full create, read, update and delete flows for products and cart.

EDUCATION

BSc Mathematics — Sambalpur University — Expected 2027

Complemented by self-directed full-stack and AI development across 50+ projects.
